5. Committee member comments

MEMORANDUM

To: Public Works Committee

From: Mike Cosby, Public Works Director

Date: February 9, 2007

Subject: Water account status – American Bridge construction trailers

The water service for the trailers installed by American Bridge for use by VDOT during the upcoming bridge project is being provided through the existing service on the old school property. At our December meeting, the Committee granted non-profit status for this account unless the use of the property changed. Some of the questions to consider are:

- The installation of the construction trailers is not permanent.
- In my opinion the water use will be minimal.
- The meter on this property is large and subject to substantial minimum charges.
- The Route 175 Bridge Tender facility has been previously approved as a nonprofit water account.
- It is my understanding that American Bridge is supplying these trailers as a part of their contract with VDOT so strictly speaking this is not a non-profit arrangement.
